DCMII MODDING / OFFICIAL COMMUNITY INTRODUCTION

THE F-16 SUFA MOD

A beginner's guide to DCMii V3.1

The DCMii F-16 Sufa Mod is a community-built expansion for DCS World. It brings additional F-16 variants, custom weapon and fuel-tank configurations, cockpit enhancements and new liveries into the simulator.

FLY

F-16CM / F-16D / F-16I

DCS WORLD 2.9 | COMMUNITY MOD

Unofficial community project - not an Eagle Dynamics product.

What does the mod add?

THREE F-16 FAMILIES

F-16CM

SINGLE SEAT

A modernized F-16-inspired option with expanded loadout choices and cockpit additions.

F-16D

TWO SEATS

Dual-seat F-16 and Barak variants with a multiplayer-accessible rear seat.

F-16I SUFA

TWO SEATS

Israeli-inspired dual-seat variant featuring conformal fuel tanks and custom configurations.

HIGHLIGHTS IN V3.1

CUSTOM LIVERIES / F-16 FLIGHT EXPERIENCE

CFT CONFIGURATIONS

Conformal Fuel Tanks (CFTs), supported fuel options and carefully aligned 1+1 / 3+1 matching-bomb layouts.

WEAPONS AND LOADOUTS

Additional options including Python-5 and AGM-154B through the relevant packages.

COCKPIT ADDITIONS

A Center Pedestal Display (CPD), plus improved DMS / SOI control behavior in V3.1.

NEW AIRCRAFT LIVERIES

Israeli, Bulgarian and Hellenic Air Force-inspired skins, with improved CFT texture compatibility.

Important: The accessible rear/WSO seat in multiplayer is not yet a fully functional second cockpit. Advanced rear-seat MFD and avionics controls are still in development.

Your first steps

GETTING STARTED

01

GET THE FILES

Use the latest main mod archive and the separate liveries archive from the DCMii Modding download channels.

02

INSTALL THE MOD

Install the main mod packages using OvGME, pointed at your DCS World installation. Follow the included V3.1 installation PDF.

03

ADD OPTIONAL SKINS

Place the extracted livery folders in Saved Games\DCS\Liveries\F-16C_50 or F-16D_50 as appropriate.

04

START DCS & CHECK CONTROLS

Select a supported F-16 variant, assign your DMS controls if required and begin with a simple test mission.

GOOD TO KNOW

WILL IT PASS MULTIPLAYER INTEGRITY CHECK?

Not necessarily. The main packages integrate into the DCS installation and may be incompatible with IC-restricted servers.

IS THE REAR WSO SEAT FULLY OPERATIONAL?

Not yet. Multiplayer rear-seat access exists, but major WSO display and control functionality is planned for a future release.

IS EVERY COMBINED LOADOUT SUPPORTED?

No. Some combinations are limited to matching bombs; experimental 3+3 TER configurations are not supported.

WHAT COMES NEXT?

V3.2 bug and texture fixes / V3.3 additional CFT layouts
V4 expanded functional WSO seat - no confirmed release date.
