What’s new in 3.2.0

SPICE 2000 integration, F-16D visual updates and optimized package sizes.

01
SPICE 2000
Integration + CFT option

02
F-16D updates
Liveries + texture fixes

03
Package sizes
Optimized for V3.2.0

01 ADDED & UPDATED

SPICE 2000 integrated
Added after an extended development and calibration effort, with repeated tuning of its in-game range behavior.

SPICE 2000 CFT configuration
Added a CFT configuration for SPICE 2000.

Default Gray for every F-16D variant
Added standard gray liveries across all two-seat F-16D variants.

CFT textures for default F-16D liveries
All default liveries for the F-16D variants now include CFT textures.

02 FIXED

F-16D nose sensor-cover texture
Corrected the texture issue on the nose-mounted sensor cover, giving the cover a uniform gray finish.

03 DOWNLOAD & PACKAGING

Optimized file sizes
Optimized the package sizes for V3.2.0. The main mod and liveries are distributed as two separate ZIP archives.

ACTION REQUIRED: GET THE SUFA INSTALLER AGAIN

Re-download the **Sufa Installer** from Discord **#mod-download**. Older versions cannot download V3.2.0. See the updated installation PDF.

Project credits: DCMii - development and integration; Kaiqi / Pobit - CPD foundation; IDF Mods Project - base aircraft; Roughmaster - original HAF liveries.
Thank you to everyone who tested, reported issues and supported the project.
