F-16 SUFA MOD

INSTALLATION INSTRUCTIONS / V3.1

01 MAIN MOD

OvGME / DCS root

MAIN ARCHIVE

DCMii-Project-F-16 Sufa Main.zip

1 Extract the main ZIP

Extract the archive. It contains multiple individual DCMii mod packages (for example, the Sufa aircraft, sounds, targeting pod and weapons).

2 Move each package into the OvGME repository

Move each individual mod folder out of any extra wrapper folder. When you open a mod folder, its installation directories must appear immediately.

CORRECT

```
DCS-Mods\
  DCMii-Project-F-16I_Sufa\
    CoreMods\
    Mods\
    Scripts\
```

WRONG - EXTRA NESTING

```
DCS-Mods\
  DCMii-Project-F-16I_Sufa\
    DCMii-Project-F-16I_Sufa\
      CoreMods\
      Mods\
```

OvGME repository example

```
C:\Users\YourUsername\Documents\DCS-Mods\
```

3 Enable your DCMii packages in OvGME

Close DCS. Select your DCS Root OvGME profile (pointing to the DCS World installation) and enable the individual mod packages. Do not manually copy the packages into DCS.

IMPORTANT

Liveries are installed separately in Saved Games. Follow page 2 for the updated V3.1 livery ZIP structure.

F-16 SUFA MOD

INSTALLATION INSTRUCTIONS / V3.1

02 LIVERIES

Saved Games / new ZIP structure

OUTER ARCHIVE

DCMii-Project F-16 Liveries.zip

SINGLE-SEATER LIVERIES

F-16C_50.zip

DUAL-SEATER LIVERIES

F-16D_50.zip

1 Extract both inner ZIP files

First extract the outer archive. Then extract F-16C_50.zip and F-16D_50.zip separately. Each inner ZIP contains the individual livery folders.

2 Copy into your DCS Saved Games folder

Place the extracted liveries under their matching aircraft folders. Merge with existing F-16C_50 and F-16D_50 folders if they already exist.

DESTINATION

C:\Users\YourUsername\Saved Games\DCS\Liveries

FINAL FILE STRUCTURE

```
Saved Games\DCS\Liveries\
  F-16C_50\
    Bulgarian Air Force bl70 311\
    Bulgarian Air Force bl70 313\
    HAF 337SQN GHOST 515\
    HAF 340SQN ALEPPOU 522\
    IAF 119th Squadron\
  F-16D_50\
    Bulgarian Air Force F-16D bl70 301\
    IAF F-16D\
```

CHECK

Each individual skin folder should contain description.lua and its textures. Do not create an extra F-16C_50\F-16C_50 or F-16D_50\F-16D_50 level.
